

26.02.2025

Dear Teachers, Students and Parents,

We're committed to protecting your security and privacy with regard to the online attendance system. Recently, we've experienced some challenges that have motivated us to strengthen our defenses against cyber crime.

To ensure your safety, we're implementing robust security enhancements, including:-

- Two-factor authentication for added login security
- Jumbled Password requirements for added password security
- Email OTP verification for secure account access
- Captcha code verification to prevent brute forces and robotic action
- Program-level security to prevent malicious code injection
- Database encryption to safeguard sensitive information
- Server-level security to protect against unauthorized access

These updates may require some adjustments on your part, but we're confident that they'll provide a safer and more secure experience.

For the safer use of the upgraded system, your credentials have been rearranged, and you will receive them in your registered email.

Thank you for your understanding and cooperation.

With Best Wishes
